## EXPERIENCE

---

### VP of Finance

#### NSCC Student Association

September 2024 – Present, Lawrencetown, Nova Scotia

- Budgeting: Organized the provided funds into 30+ categories so that the student association could meet the monthly/yearly expectations.
- Time Management: balancing responsibilities between the student association and class to meet the expected office hours and quality of work I deliver.
- Chairing Meetings: led meetings with 7+ members of the Student Association to discuss the state of the budget and funding for student activities chaired by the association.

### Volunteer

#### The Wolfville Memorial Library, Nova Scotia

March 2023 – August 2023

- Patience: teaching and providing support to somebody who might not be very technologically literate.
  - Adaptability: learning the technologies within the lab and conducting research to effectively teach them to anyone who needed assistance.
  - Troubleshooting: fixing tech problems at the Lab and providing visitors with any help possible with their tech problems.
- 

## PROJECTS

---

### Laravel Inventory System

#### Server Side Development (PHP)

- Solo developed an inventory management system for a store utilizing the PHP framework Laravel.
- Learned the framework on the spot as the time given for the project was under a week.
- Utilized eloquent ORM and appropriate Laravel command line tools to produce a worth while project that focused on the interactions of the database with website itself.

### "InProgress" Productivity App

#### Mobile Development (Kotlin JetPack Compose)

- As part of the final project for my Mobile Development class, two other classmates and I developed a rudimentary productivity app in Jetpack compose.
  - The program helps track and schedule tasks and set productivity timers to minimize procrastination.
  - This application included CRUD operations with a local SQLite database along with an elementary authentication page which allowed for multiple users to login and this allowed tasks to be tied to each "account".
- 

## EDUCATION

---

### IT Programming

COGS NSCC • Lawrencetown, Nova Scotia • Expected Graduation Date: April 2025

### CS50AI

Harvard CS50xx • Online, Cambridge, USA • Expected Finish Date: April 2025

---

## SKILLS

---
